## **Religious Education**

The school teaches the LA's agreed Gloucestershire syllabus for Religious Education <http://www.gloucestershire.gov.uk/schoolsnet/CHttpHandler.ashx?id=50197&p=0>, We are a Church of England school and have excellent links with our local church. Our new vicar (Rev. Andy Sewell) visits our school at least once a week to deliver Collective Worship and team teach RE to specific classes. It is wonderful to have this extra input, which supplements our curriculum, providing another level of expertise. We also hold a collective act of worship everyday, which is Christian based with strong links to values (of which we change each term to reflect the Christian calendar, as well as current local and global events).

## **Science**

Science is taught across the school in line with the expectations set out in the National Curriculum. We have a clear coverage tracker, which ensures progression in knowledge acquisition. Skills trackers for investigative skills in Science are used to assess progress and attainment, and provide teachers with regular updates to plan for individual needs. Science is taught in blocks/units and learning is revisited where needed.

## **Physical Education**

Please see our PE policy and main tab on home screen.

## **Humanities, Art, DT, Computing, Music and MFL**

These are as laid out in the National Curriculum in terms of coverage and knowledge acquisition. Coverage plans are in place where appropriate to support the planning process, however teachers are encouraged to use creativity and flexibility to teach these in with/to compliment their topic.
